

Directions for using the Purple Feud Game

- The key to utilizing the Purple Feud game – is that all animation and sounds do not work unless you have the game in *play slide show*, not just in *view* mode. Click the *Slide Show* tab on the tool bar at the top of the page and then click on *From Beginning* to access the slide show mode.
- The slide show will open to a blank page with only the LWML logo showing, click anywhere on the page and the spinning Purple Feud logo will appear. Click again anywhere on the page and the first question will pop up. Click once more on the page and the answer screen will appear
- Once you have the answer screen up, all you have to do is use your mouse to click on the answer box corresponding to the contestant's answer, or one of the three missed answer boxes with the X on the bottom part of the screen.
- If you accidentally click the wrong box, just back up one slide and the slide will reset to the beginning.
- Print the answer sheet, for the person who will be running the mouse to follow along and make answer determinations.
