

Facilities Visioning Update:

As a result of the surveying conducted earlier this year, and based on the "needs" assessment subsequently reported to Council and approved by council, we have contracted with local architectural firm InForm to create a comprehensive "Master Plan Study". This plan will be a more comprehensive and visual depiction of a possible facility "future state" and include a more detailed "gap analysis" than is possible by non-professionals. It does not represent an approval or decision to proceed beyond a study. Such a study is a strongly suggested first step before any conversations regarding a potential building or remodeling project can be discussed, and is something the church has not previously completed.

The first step in its creation is for InForm's professionals to conduct a listening session with the entire congregation. That is scheduled for **November 3, immediately following our service**. InForm has conducted many of these sessions and assures us that it will be completed in approximately 45 minutes. It is critically important that we hear from all of you and so we would like to ask every one to make an effort to participate.

Your voice is important so please mark your calendar today!

Feel free to reach out to Dave Maurer if you have any questions on this.
