

Whereas, Hosanna presently has a fund known as the Capitalization, Preservation, and Replacement (CPR Fund) which supports unplanned maintenance needs and,

Whereas, there are needs for improvement of the building which have been postponed for several years, and

Whereas, a Task Force was created to determine the priorities of those needs, at which time they have met, created and now put forth this Top Ten List to the congregation:

Priorities set by Imagine the Possibilities Task Force:

1. Check the integrity of the roof; inspect/repair as proposed by roofer.
2. Lift Station revisions to protect from lightning strikes.
3. Replace all light fixtures in the original building. Replace all light bulbs in fellowship hall.
4. Remodel both restrooms in original building.
5. Remodel the entire kitchen.
6. Recondition the sanctuary.
7. Add tapering ramp/s for handicap accessibility and add handicap parking spaces.
8. Install handicap access doors for Northside and Southside Main Entries.
9. Purchase additional chairs and tables for the new addition.
10. Paint the walls in new building.

Therefore, be it resolved, that Hosanna create a second designated fund to address these Top Ten planned capital improvement needs and encourage one another to support this fund until these top ten priorities have been met. In order, these items will be addressed and taken care of only as funds become available to complete the project.
