

SMART CHURCH
S O L U T I O N S

Post - COVID-19

Facility Utilization:

Social Distancing, Ministry Considerations, and More...

Smart Church Solutions has developed this guide to help you consider how you can effectively and intentionally resume a limited live meeting and worship experience while still adhering to the ever-changing recommendations. We have attempted to present many of the more difficult choices you will need to consider prior to the resumption of operations, albeit in a limited capacity.

Whether you personally agree with some of the suggestions and restrictions on large group gatherings (that vary from state to state and sometimes county to county), we encourage you to take the lead in adhering to public gathering safety guidelines. To intentionally disregard suggested measures is not prudent nor is it a good witness.

This list is NOT exhaustive and must be considered at the local church level. Be wise and prudent as you navigate these highly unique times.

1. Cleaning Supplies Prep -

Are you really prepared?

Some considerations include:

- Have we prepared a document detailing the cleaning processes in place and the chemicals used to help alleviate concerns of those returning to the facility?
- Have we updated my Hazardous Communication Plan and Safety Data Sheets with any new chemicals?
- Have we purchased all the supplies needed to adequately cover the increased cleaning plan?
- Have we trained the team, and are we prepared to schedule them accordingly, to cover the cleaning needs?
- Do we have what is needed to quickly clean and sanitize “high-touch” areas and do we have the proper Personal Protection Equipment (PPE) and protocols in place for any body-fluid clean-up?

WHAT WE NEED TO DO:

[illegible]

2. Space Consideration –

Are you only using what you "need"?

Some considerations include:

- Have we thought through the areas we really do not need (for reduced operations) and cordoned them off so we do not have to re-clean them?
- Have we considered having a means by which we can indicate a room has been cleaned last? *Think of how many public restrooms use a posted document to indicate the last time it has been serviced.*
- Have we considered not offering any prepared beverages or snacks (coffee, donuts, snack crackers) to avoid the additional cleaning requirements and to help avoid body-fluid transfer? *Perhaps provide bottled water, if necessary.*
- Do we need to remove seating groupings in the shared area to help avoid clustering?
- Have we considered removing all non-essential tables and info stands from public areas to reduce contact surfaces and perhaps run announcements on a TV or monitor?
